

OPERATING INSTRUCTIONS

By using the proper accessory, your "itty bitty"® book light can be operated with either batteries, 110-volt electric house current, or 220-volt electric house current. Your model may not have all these accessories included.

Using battery power:

1. Open battery pack as shown in illustration and insert 4 Alkaline "C" batteries.
2. Plug lamp cord into battery pack.

Using electrical current:

3. If you have a 110/220 volt adapter, put it on appropriate setting.
4. Plug lamp cord into adapter. Plug adapter into outlet.
5. Rotate switch either direction to turn light on/off. If lamp does not light, tighten bulb. It may have come loose in shipping.

Attaching light to book:

6. On hardcover books: clip light to back cover as close to spine as possible.
7. On softcover books: clip light to last 30 to 50 pages of book. To read end of book: clip light to first 30 to 50 pages.

Replacing bulb:

8. Pull out front half of light head. Unscrew bulb and replace with new "itty bitty" replacement bulb.
